DOI (Digital Object Identifier)

DOI — цифровой идентификатор объекта.

Имя DOI является идентификатором
(а не местоположением) объекта в цифровых сетях.

DOI обеспечивает систему для постоянной и
действенной идентификации и
интероперабельного обмена управляемой
информацией в цифровых сетях.

Что такое PID (Persistent Identifier)?

Постоянный идентификатор (PID) —
это долговременная ссылка на ресурс.

Часто PID ассоциируется с набором метаданных,
описывающих объект.

В современной научной среде широко распространены
два типа PID:

- *PID для людей (исследователей, авторов, участников конференций и т.д.);
- *PID для объектов (публикаций, данных, программ и т.д.).

The DOI® System

ISO 26324

This is the web site of the International DOI Foundation (IDF), a not-for-profit [membership organization](#) that is the governance and management body for the [federation of Registration Agencies](#) providing Digital Object Identifier (DOI) services and registration, and is the registration authority for the ISO standard (ISO 26324) for the DOI system. The DOI system provides a technical and social infrastructure for the registration and use of persistent interoperable identifiers, called DOIs, for use on digital networks.

Resolve a DOI Name

Type or paste a DOI name, e.g., 10.1000/xyz123, into the text box below. (Be sure to enter all of the characters before and after the slash. Do not include extra characters, or sentence punctuation marks.)

SUBMIT

Clicking on a DOI link (try this one: <https://doi.org/10.1109/5.771073>) takes you to one or more current URLs or other services related to a single resource. If the URLs or services change over time, e.g., the resource moves, this same DOI will continue to resolve to the correct resources or services at their new locations.

Check the current status of the DOI system at doi.statuspage.io.

DOI change log

DOI change log for UK Data Service data catalogue record:

Quarterly Labour Force Survey, January - March, 2011: Special Licence Access

A new Digital Object Identifier (DOI) is assigned to the data collection each time there is a major change to data, documentation or metadata. The new DOI will resolve to an updated version of this page containing a log of changes to this data collection since the allocation of its first DOI. The DOI system supports resource discovery and simplifies citation for users of data collections. Data producers benefit directly through increased visibility of their work.

Проект ZENODO

The screenshot displays the Zenodo website's main interface. At the top, a blue header contains the Zenodo logo, a search bar, and navigation links for 'Upload' and 'Communities'. A user profile for 'iradche@gmail.com' is visible in the top right. Below the header, the 'Featured communities' section highlights the 'Coronavirus Disease Research Community - COVID-19'. This section includes a 3D model of a coronavirus particle, a description of the community's purpose, and buttons for 'Browse' and 'New upload'. Below this, the 'Recent uploads' section features a listing for 'ocelhay/como: v17.1.0' by Olivier, with tags for 'February 8, 2021 (vv17.1.0)', 'Software', and 'Open Access', and a 'View' button. On the right side, a 'Need help?' section provides a 'Contact us' button and text stating that Zenodo prioritizes requests related to the COVID-19 outbreak.

Coronavirus Disease Research Community - COVID-19

This community collects research outputs that may be relevant to the Coronavirus Disease (COVID-19) or the SARS-CoV-2. Scientists are encouraged to upload their outcome in this collection to facilitate sharing and discovery of information. Although Open Access articles and datasets are...
